-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1711

Applicant's arguments filed 3-9-04 have been fully considered but they are not persuasive.

Rejection under 35USC112 is withdrawn in light of applicants' amendment. All rejections not previously set forth herein are hereby withdrawn in light of applicants' amendments and remarks.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 6 is rejected under 35 U.S.C. 102(b) as being anticipated by Dany et al.(3,847,843).

Dany et al. (see column 5, example 2, as well as, the entire document) disclose polyurethane foams of the soft/flexible make-up which employ acrylic acid derivatives in amounts which read on those of the claims. The reactive features indicated in claim 6 are held to be inherently possessed by the teachings of Dany et al. as such are reactions which would occur natural upon aging of the polyurethanes due to hydrolytic cleavage of the urethane and urea bonds in the presence of the instant compounds.

Applicants' arguments have been considered, however, applicants have not demonstrated that the reactions do not, in fact, occur in the preparations of Dany et al.

Claim 1 and 4-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Fishback et al.(5,523,333).

Fishback et al. (see column 5 lines 12-14 and 25, as well as, the entire document) disclose the use of fumaric acid in the making of polyurethane foams in amounts which read on those claimed. Fishback et al. further teaches that its acids may contain primary/secondary amino groups reaction with each other to some degree to form the compounds of claim 6 is seen to be inherent to the teachings of Fishback et al.
